Repeated-trial speech-timing trajectories
A DDK Rate
High-Low trajectory divergence: q < .001
DDK Rate (syll/s)
Block condition
Low
High
Trial within block
B DDK Duration
High-Low trajectory divergence: q < .001
DDK Duration (ms)
Trial within block
C Intersyllabic-gap Duration
High-Low trajectory divergence: q = .005
Intersyllabic-gap Duration (ms)
Trial within block
D Intersyllabic-gap Regularity
High-Low trajectory divergence: q = .008
Intersyllabic-gap Regularity (ms)
Trial within block
